IV. How to Create Rounder Result

C. Using Data Loader

I. How to Setup and Login using Data Loader

II. How to Upload Rounder Visit

III. How to Upload Rounder Result

A. Process Details

I. Rounder Setup Process

Below is the setup process for the Rounder Visit and Rounder Result objects.

Step	Who	What
1	R/M SV	Create/Upload a new RM Request for rounder.
2	R/M SV	Create/Upload a Rounder Visit linked to the RM Request.
3	R/M SV	Prepare the Rounder Result file including the several rows for different brands.
4	R/M SV	Creates the Rounder Result on the frontend, or insert the file using data loader

II. Mapping for the New Initiative Brand & Category

The mapping provided in the below table is used in the backend for the Rounder Results object. The value of the *Category* field will be populated in the backend depending on the value input by the user for the *New Initiative Brand* field.

They are mapped as follows:

New Initiative Brand	Category
アリエール	洗剤
ボールド	洗剤
さらさ	洗剤
レノア超消臭	柔軟剤
レノアハピネス	柔軟剤
ジョイ	キッチンケア
ファブリーズ（スプレー）	エアケア（ファブリックリフレッシャー）
ファブリーズ（車）	エアケア（エアリフレッシャー）
ファブリーズ（部屋）	エアケア（エアリフレッシャー）
ファブリーズ（トイレ）	エアケア（エアリフレッシャー）
パンパース	ベビーケア
パンテーン	ヘアケア
ｈ＆ｓ	ヘアケア
ヘアレシピ	ヘアケア
ハーバルエッセンス	ヘアケア
ウィスパー	フェミケア
オーラル B	オーラル

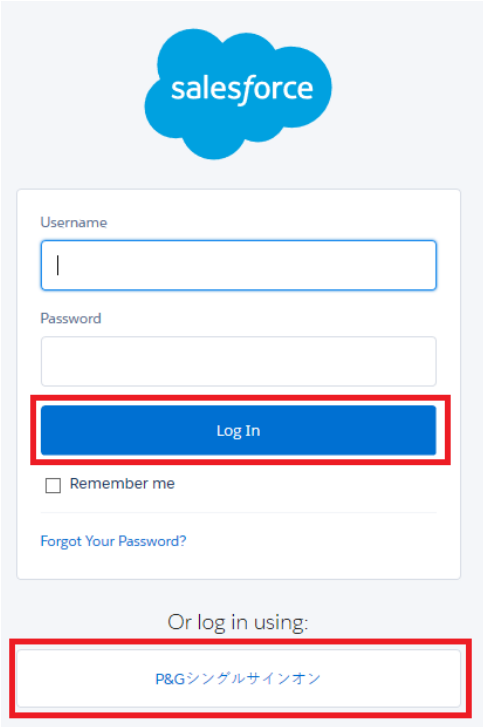
ジレット	カミソリ

B. Using Salesforce Frontend

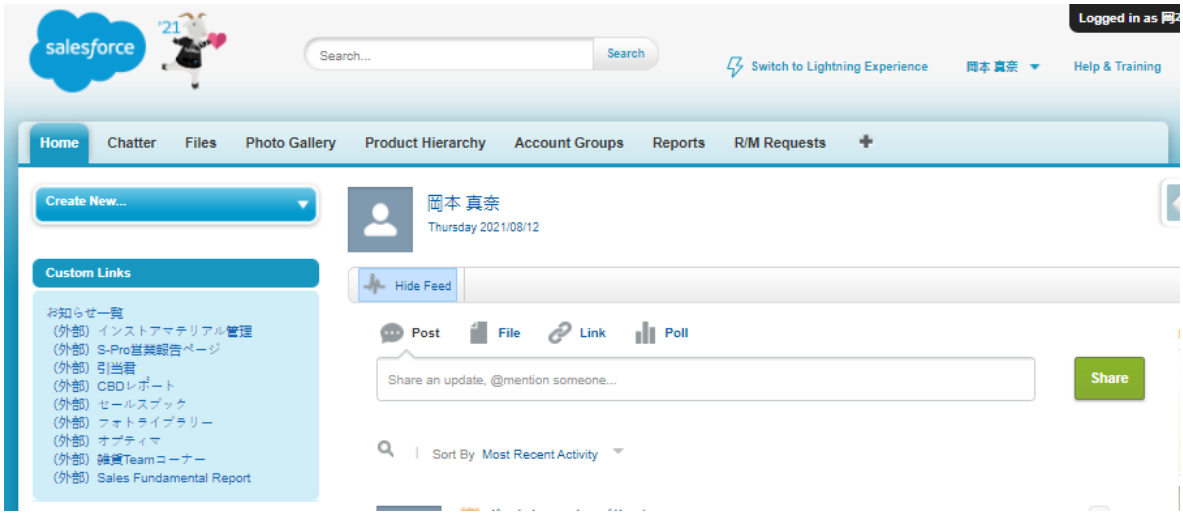
I. How to Login to Salesforce

1. Access Salesforce using below link.
   Link: https://jppaperlesssfa.my.salesforce.com/

2. Log in your user credentials.
   Note: If you have a P&G account, you may use [P&G シングルサインオン(Single Sign On)] button to login using your P&G Single Sign On credentials. Otherwise, login using the [Log In] button.

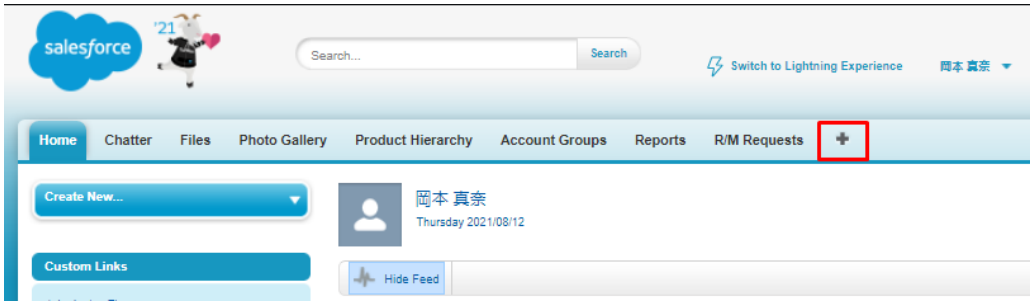


3. Once logged in, you will be redirected to the *Home* page.

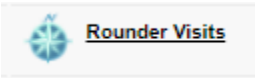


II. How to Create Rounder Visit

1. Click on the **[+]** to show all tabs.

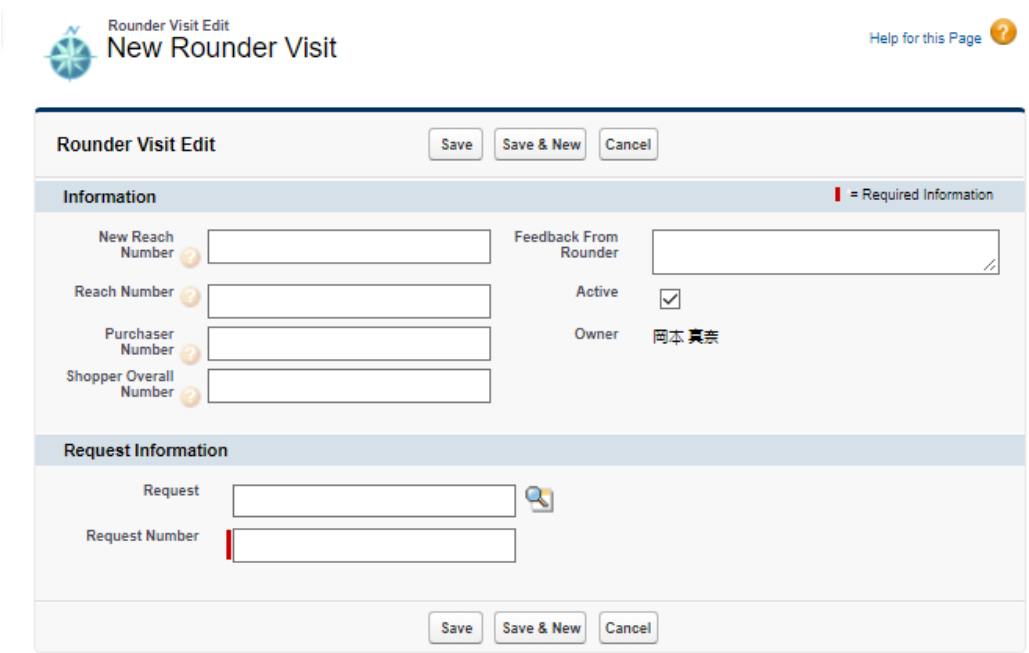


Select **[Rounder Visits]** tab.



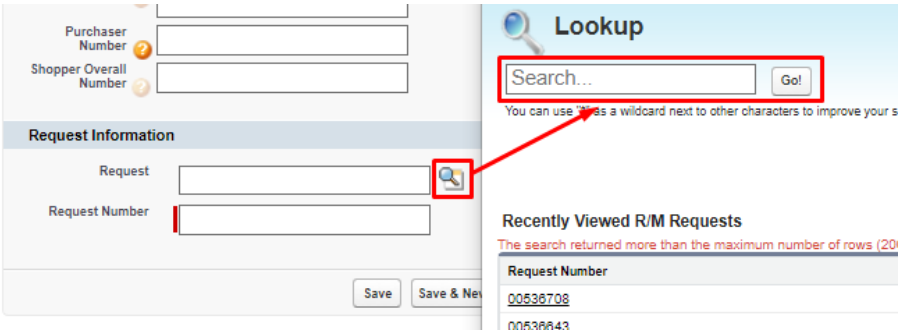
2. Once redirected to the *Rounder Visits* page, click the **[New]** button.

3. Input values on the fields in *New Rounder Visit* page, then click the **[Save]** button.

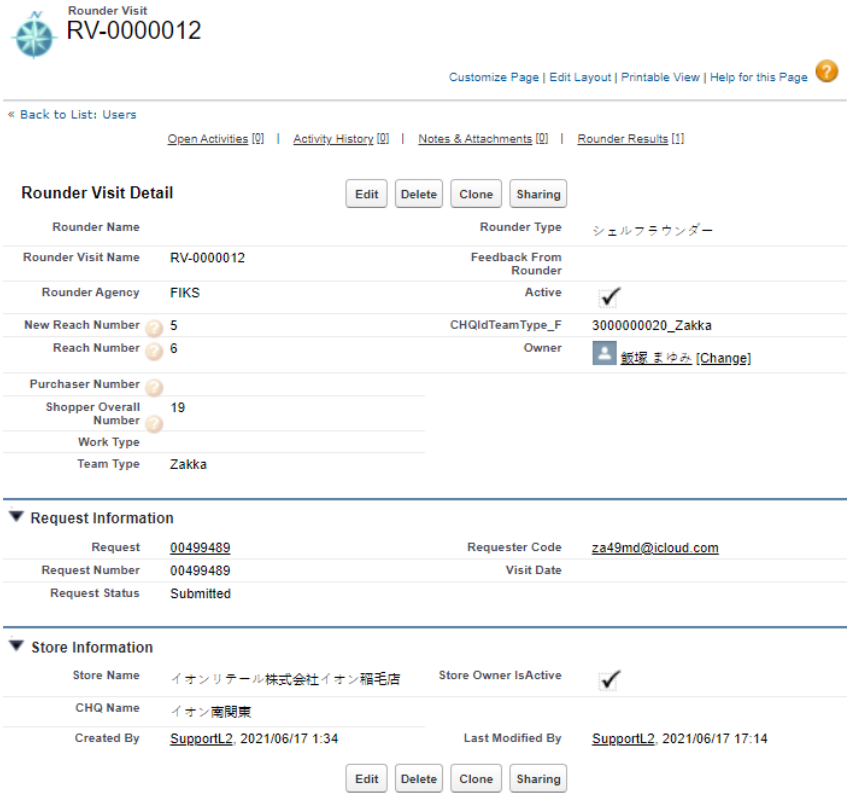


Fields	Description
New Reach Number	The number of people who first learned about the product through customer service
Reach Number	Number of Customers
Purchaser Number	Number of Purchasers
Shopper Overall Number	Number of Visitors (near the event venue)
Feedback from Rounder	Feedback from Rounder
Request	Lookup the R/M Request in this field
Request Number	R/M request record number should be input here

Note: Look up function can be used using the magnifying glass icon.

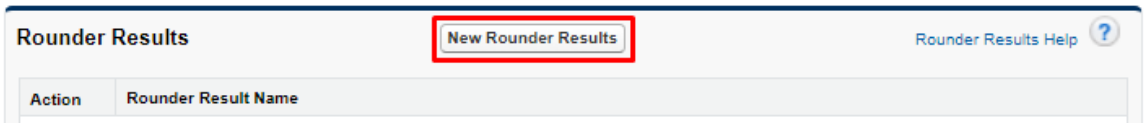


4. Below is a sample Rounder Visit Record.

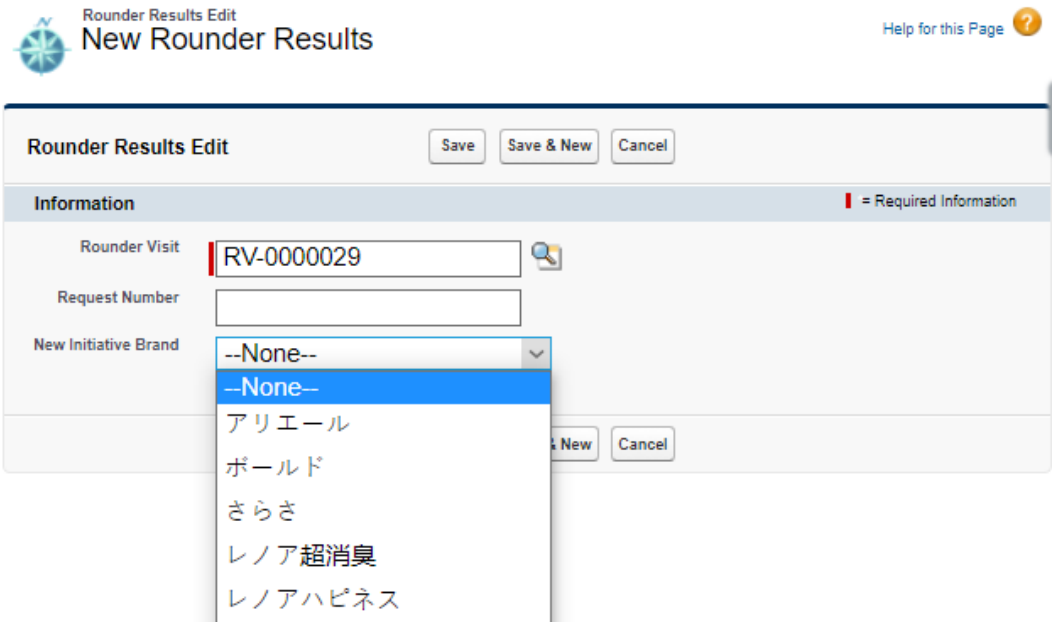


III. How to Create Request Result

1. After the Rounder Visit is created, the new record can be opened to create a Rounder Result. This can be done by scrolling down to the bottom of the record to find the *Rounder Results* tab.
   Click the **[New]** button to create a new Rounder Result record.

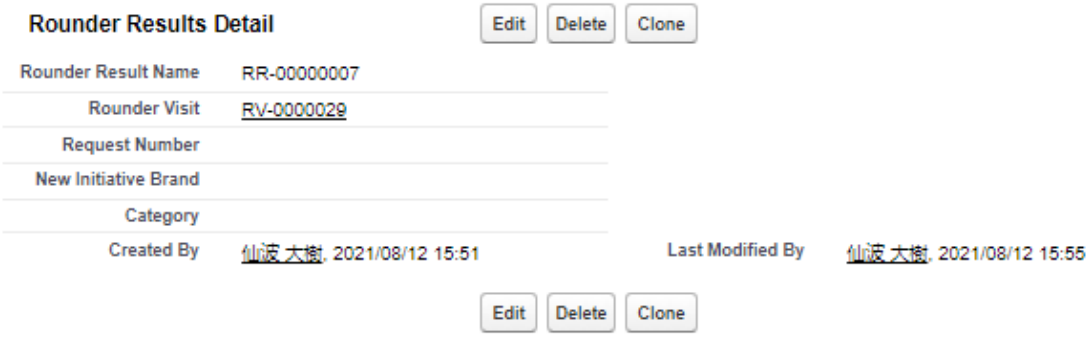


2. Input values on the fields in *New Rounder Visit* page, then click the **[Save]** button.



Fields	Description
Rounder Visit	Already populated by the system, links the Rounder Visit
Request Number	R/M request record number should be input here
New Initiative Brand	The value of category depends on the New Initiative brand (see table on section II)

3. Below is a sample Rounder Visit Record.

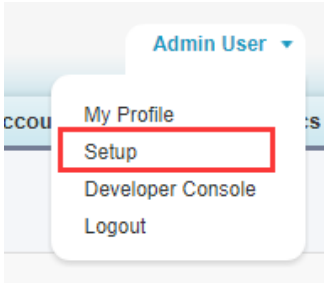


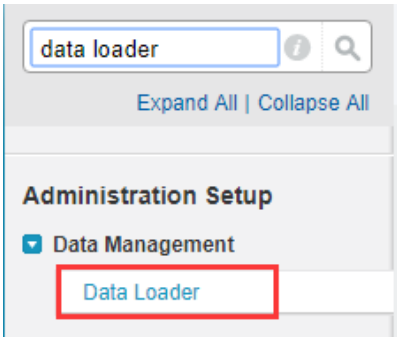
C. Using Data Loader

I. How to Setup and Login using Data Loader

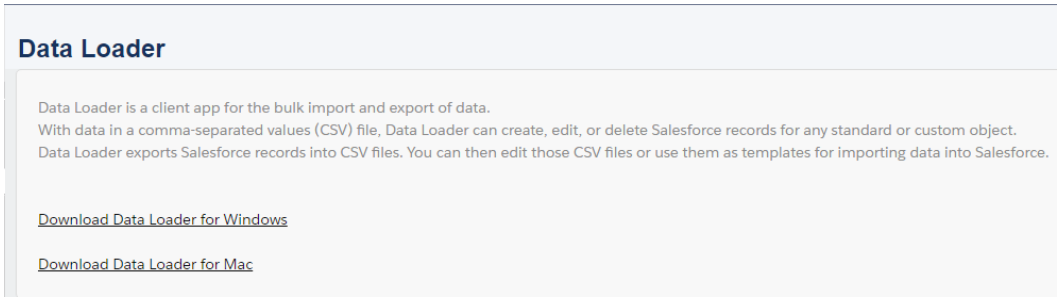
1. You can login to Samurai Pro Salesforce website and go to the user's name at the right top of the page.

Search for data loader at the setup search box on the left side of the page.



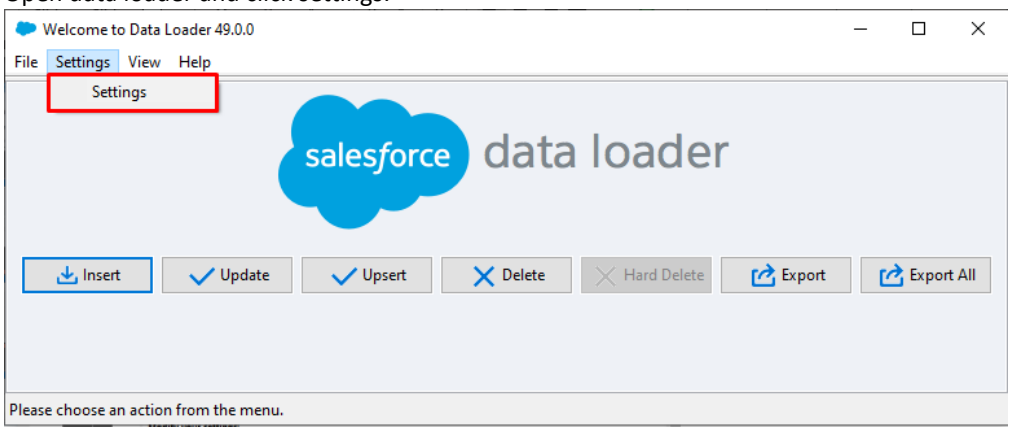


2. Load and click download for windows or Mac button to download the software

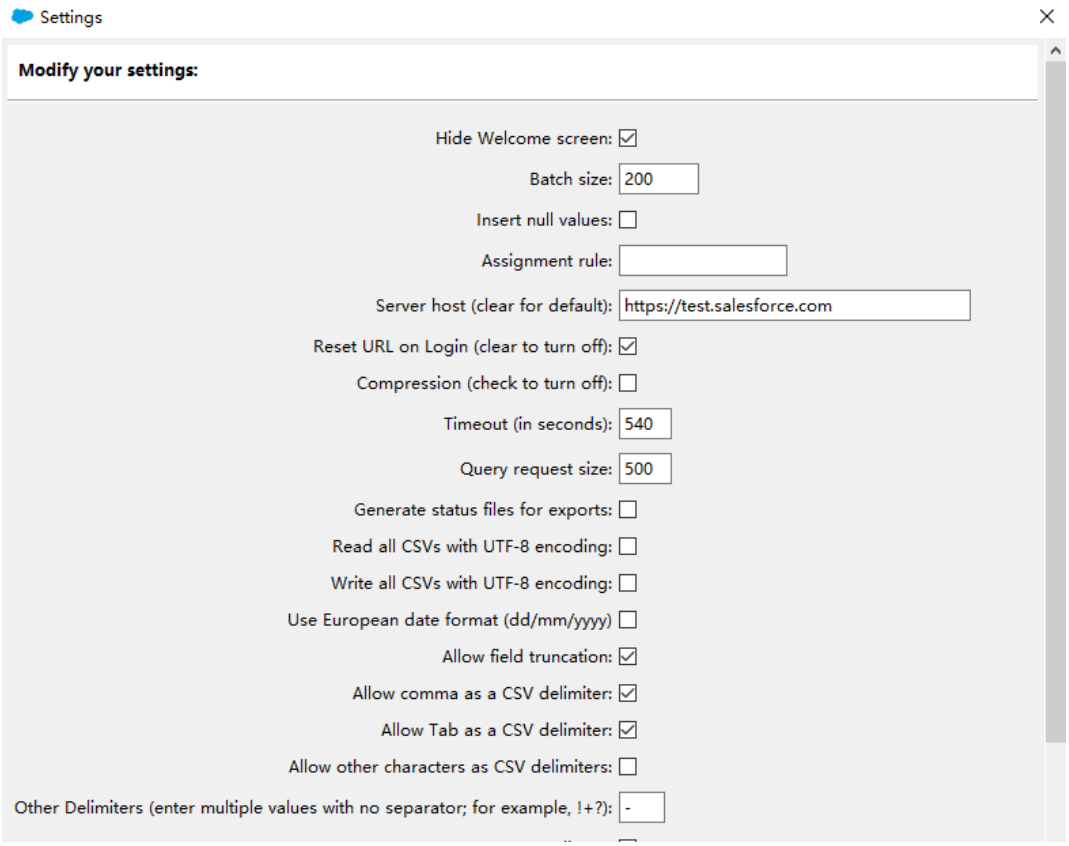


3. Install the software using the file downloaded.

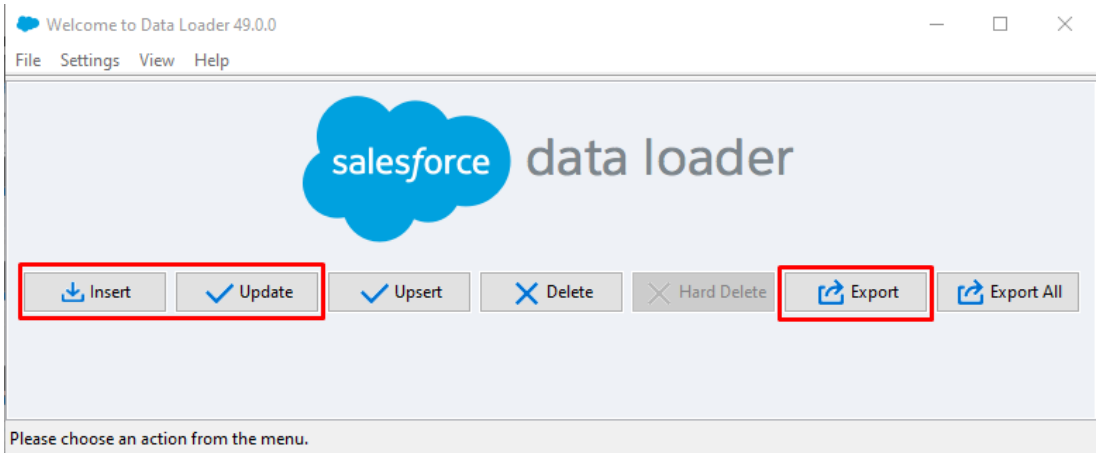
4. Open data loader and click settings:



5. Follow the setup from the below screenshot. In the server host field, input the environment address.
For Production https://login.salesforce.com
For Sandbox https://test.salesforce.com

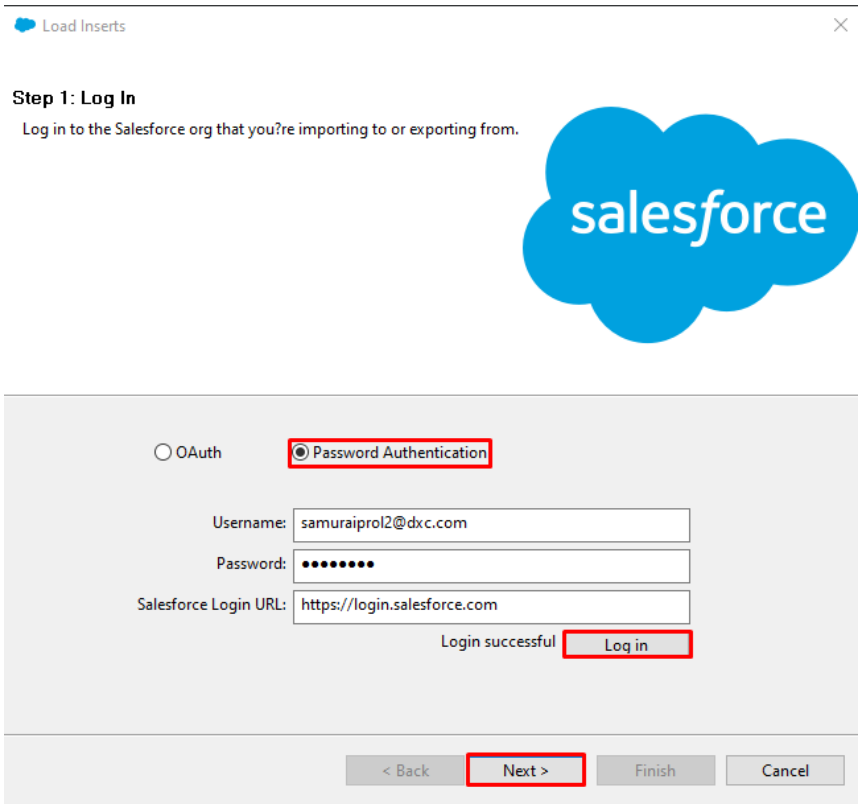


6. To login, choose which action you need to perform.
   The highlighted part are the recommended actions, as other options may incur impact on production data.



Action	Description
Insert	Create new records
Update	Update existing record: Record ID is required when updating records
Export	Export existing data from database

7. After choosing an action, a login prompt will open.
   Choose Password Authentication and login with user credentials.
   Make sure that the Salesforce URL is setup correctly.
   For Production https://login.salesforce.com
   For Sandbox https://test.salesforce.com
   Once done, click the **[Login]** button, and then the [Next] button to proceed with the action chosen.



II. How to Insert Rounder Visit

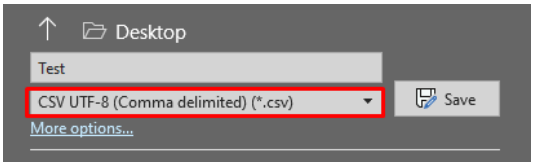
1. Prepare an excel **.csv** file and *include the necessary fields as row names*. The fields are listed as API field names so that they can automatically map to the data loader.

Fields	Description
NewReachNumber__c	The number of people who first learned about the product through customer s
ReachNumber__c	Number of Customers
PurchaserNumber__c	Number of Purchasers
ShopperOverallNumber__c	Number of Visitors (near the event venue)
FeedbackFromRounder__c	Feedback from Rounder
Request__c	Input the *actual Salesforce record ID* of the R/M Request in this field.
RequestNumber__c	R/M request record number should be input here

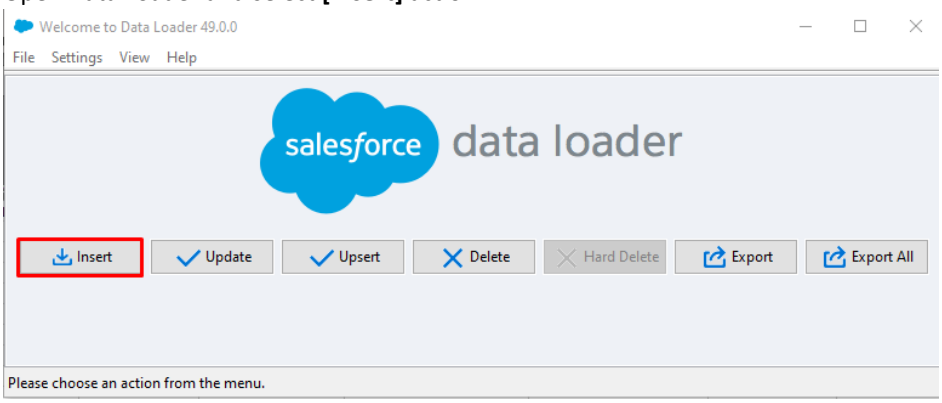
The excel file should look like below sample:

	A	B	C	D	E	F	G
1	NewReachNumber__c	ReachNumber__c	PurchaserNumber__c	ShopperOverallNumber__c	FeedbackFromRounder__c	Request__c	RequestNumber__c
2	1	1	1	1	test	a1V4N000005NFpg	00525342
3							

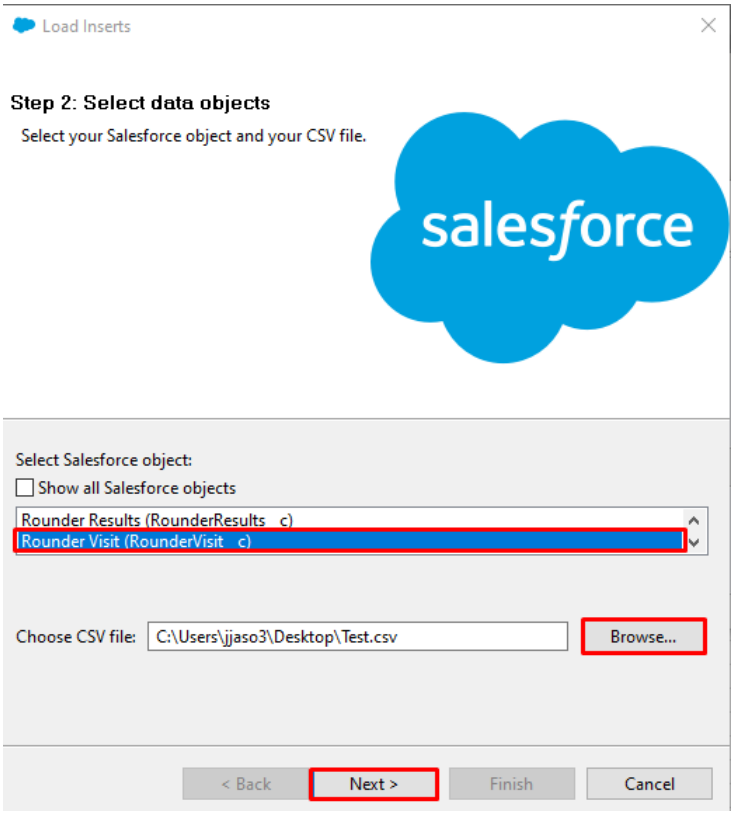
Save the file as **CSV UTF-8** format.



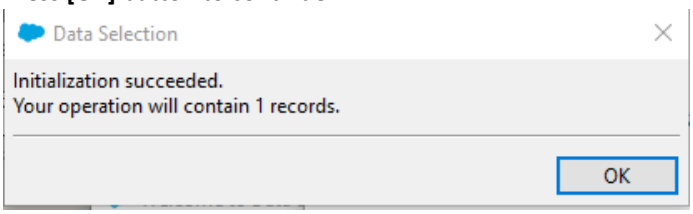
2. Open Data Loader and select **[Insert]** action.



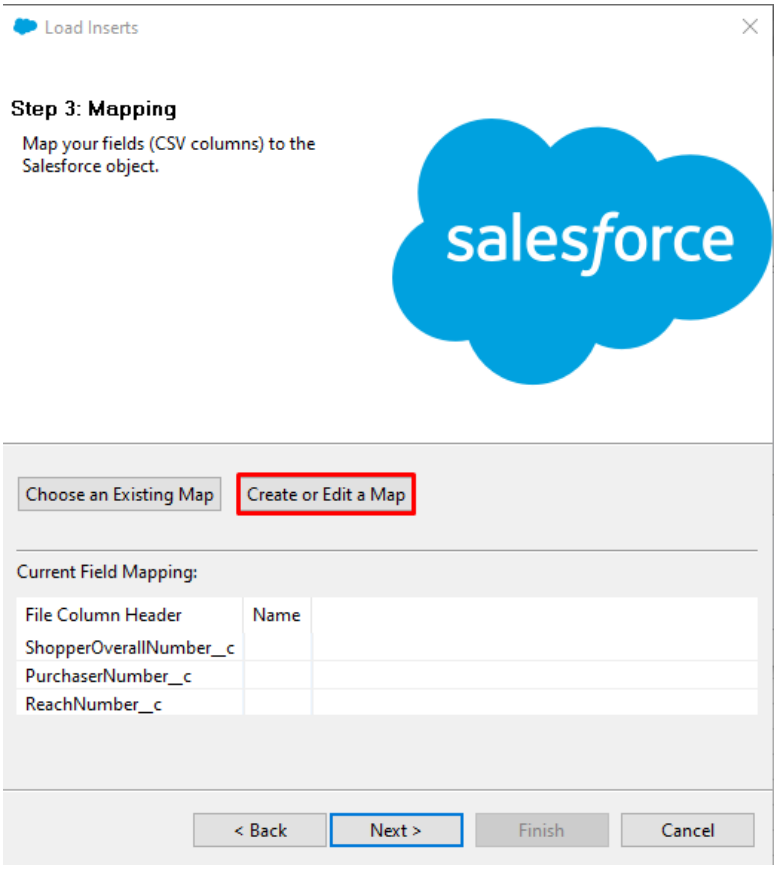
3. A prompt will open, find the Rounder Visit object and click **[Browse]** button to find the file saved. Click **[Next]** once done.



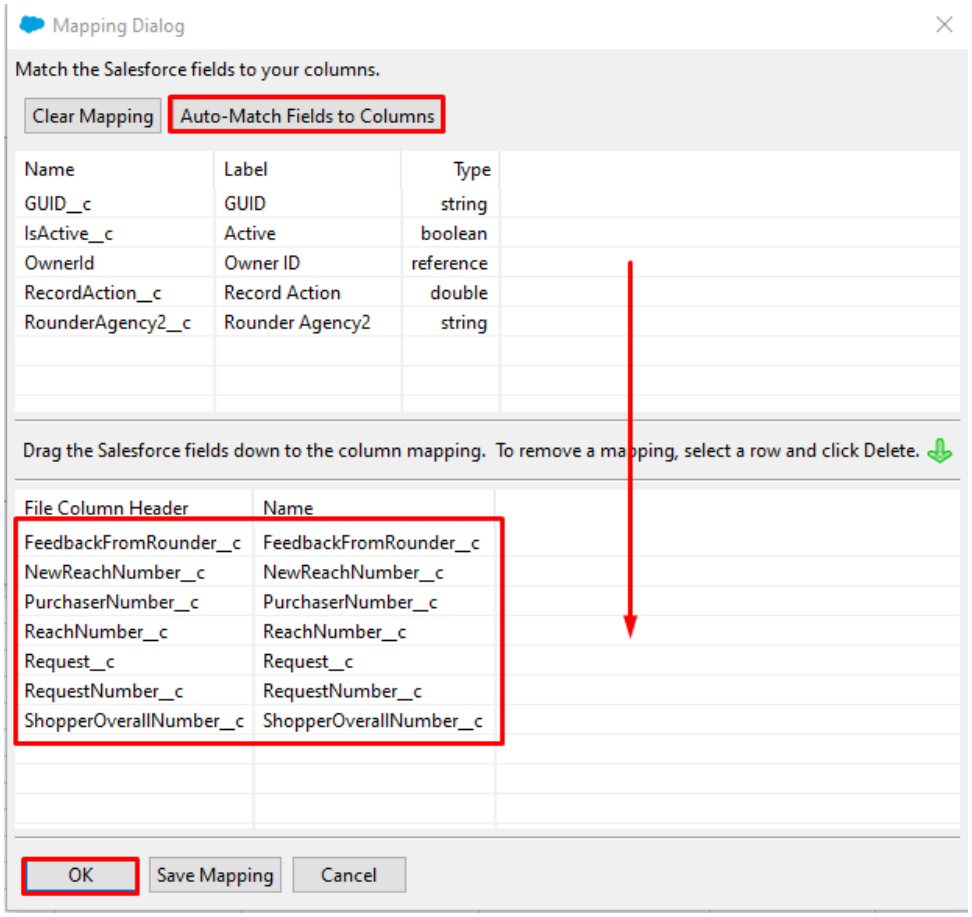
4. An initialize prompt will open to show the number of records.
   Press **[OK]** button to continue.



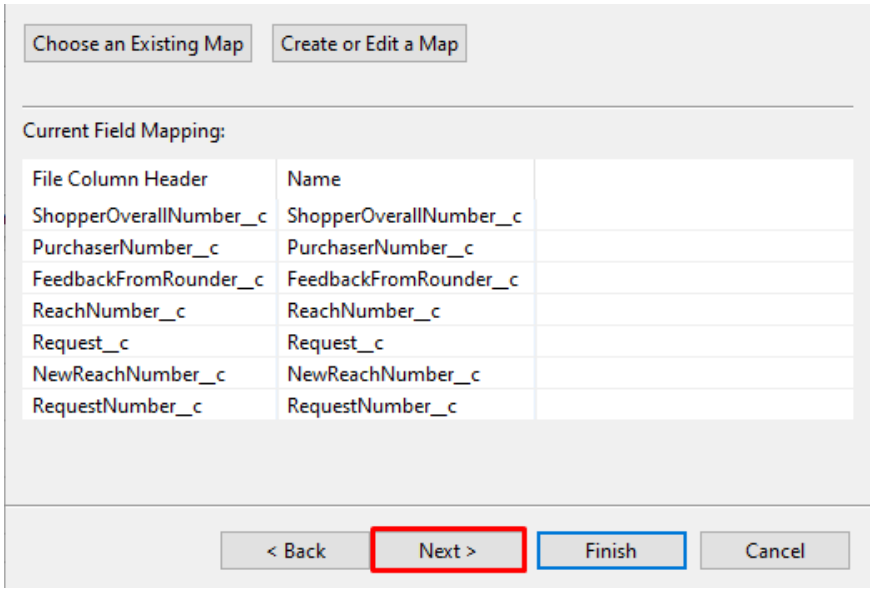
5. The Mapping prompt will show.
   Click **[Create or Edit a Map].**



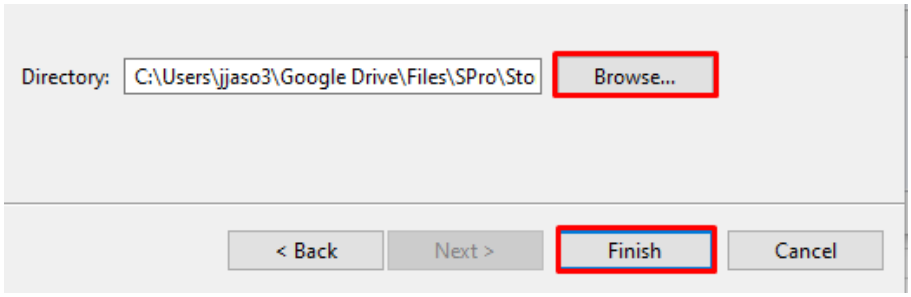
6. Click **[Auto-Match Fields to Columns]**. If the row names are correct, they will be automatically mapped as below. If some fields are not mapped, drag the field name to the corresponding field at the bottom half of the prompt. Press **[OK]** button once done.



7. The Mapping prompt will return.
   The current field mapping will be shown for review.
   If there are no blank fields, press **[Next]** button.



8. The final prompt will let the user choose where to save the logs of the upload.
   Click **[Browse]** button to select, then press **[Finish]** once done.
   If successful, records from the file will be uploaded to Salesforce.



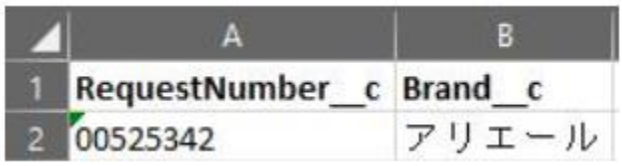
III. How to Insert Rounder Result

1. Prepare an excel **.csv** file and *include the necessary fields as row names*. The fields are listed as API field names so that they can automatically map to the data loader.

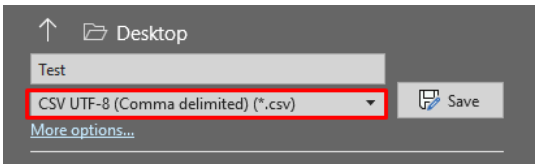
Fields	Description
RequestNumber__c	R/M request number should be input here.
Brand__c	The New Initiative brand name should be input here.

Note: The Rounder Visit will automatically be mapped by the system based on the R/M request provided.

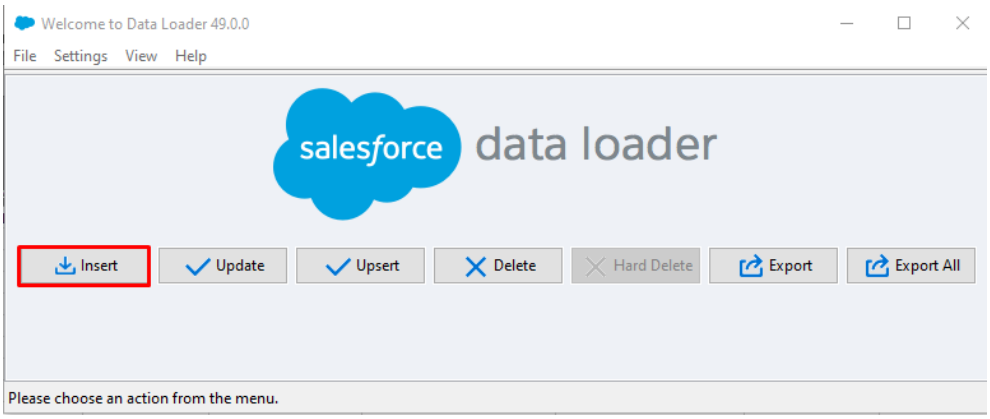
The excel file should look like below sample:



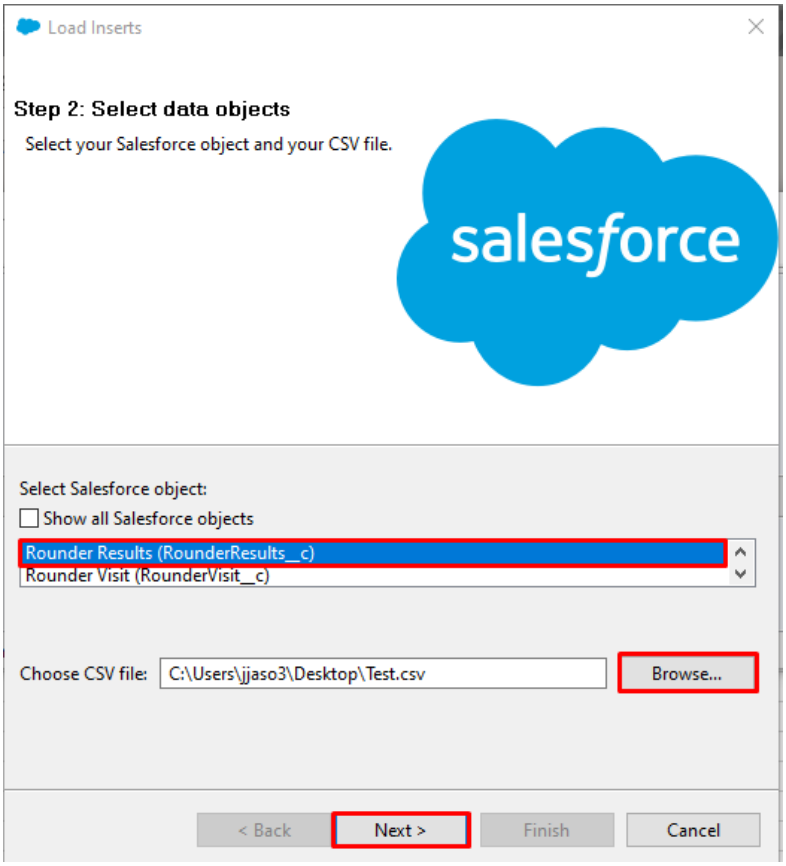
Save the file as **CSV UTF-8** format.



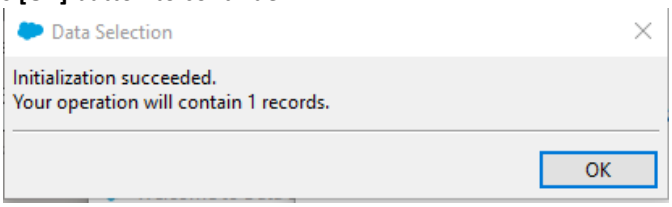
2. Open Data Loader and select **[Insert]** action.



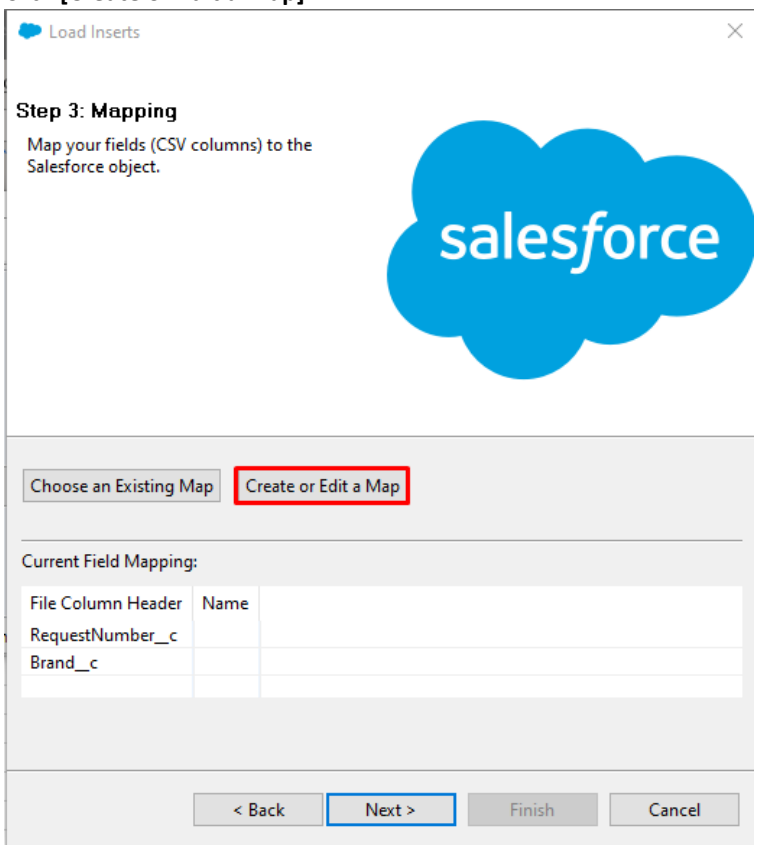
3. A prompt will open, find the Rounder Results object and click **[Browse]** button to find the file saved. Click **[Next]** once done.



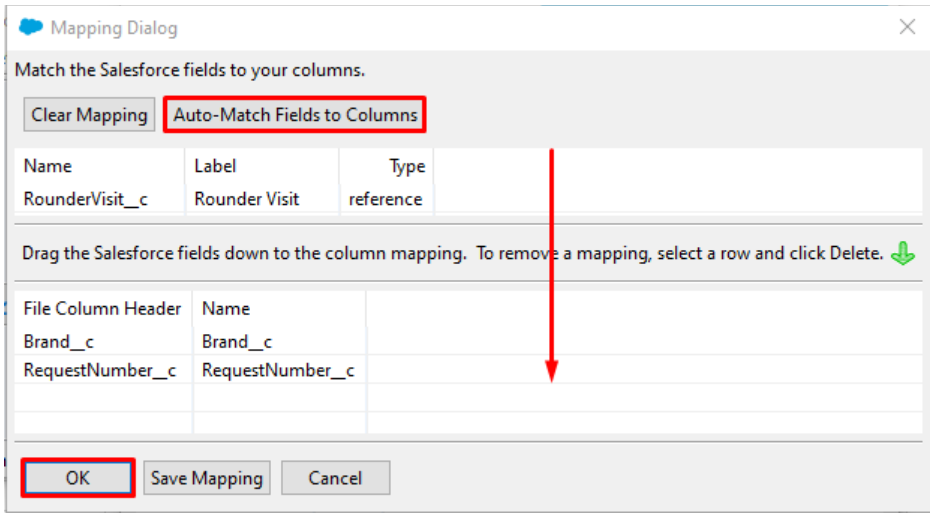
4. An initialize prompt will open to show the number of records. Press **[OK]** button to continue.



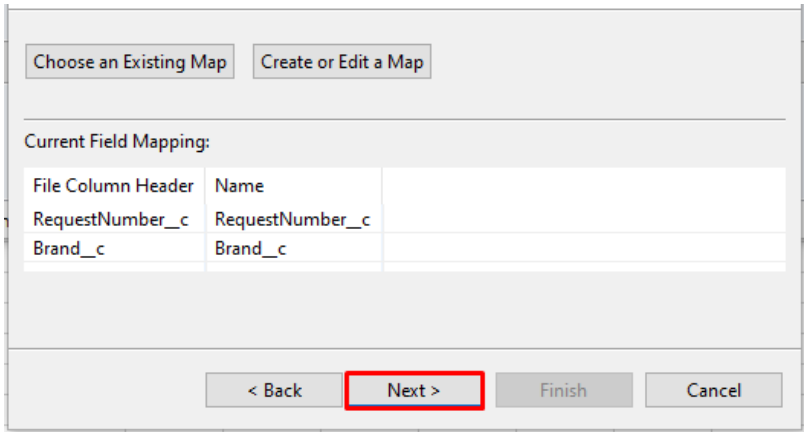
5. The Mapping prompt will show.
   Click **[Create or Edit a Map]**.

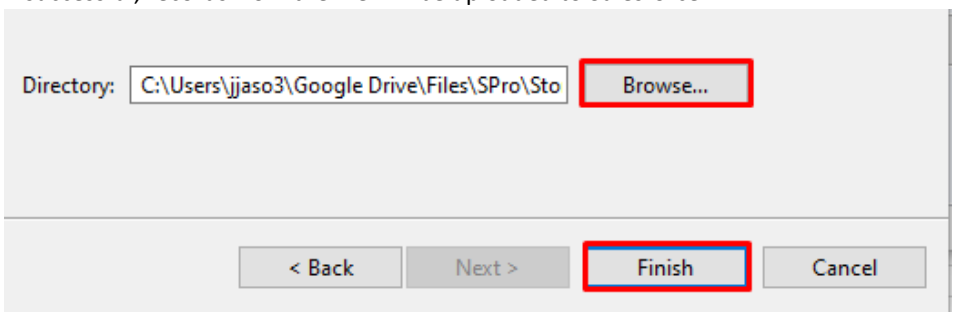


6. Click **[Auto-Match Fields to Columns]**. If the row names are correct, they will be automatically mapped as below. If some fields are not mapped, drag the field name to the corresponding field at the bottom half of the prompt. Press **[OK]** button once done.



7. The Mapping prompt will return.
   The current field mapping will be shown for review.
   If there are no blank fields, press **[Next]** button.





8. The final prompt will let the user choose where to save the logs of the upload.
   Click **[Browse]** button to select, then press **[Finish]** once done.
   If successful, records from the file will be uploaded to Salesforce.
