RTDC Overview-

RTDC Overview Data Integration is the interface wherein Key Performance Indicator (KPI) is being processed. These KPIs that are used by business were like metrics to show how the store is performing based on the products per category.

Axon files are being extracted in a weekly and yearly basis by Axon Team and OM/L2 Team separately.

RTDC requires two different files to be completed.

1. SProRTDCRaw Extract – This file is being extracted by Axon Team automatically and will be sent to L2 Team's P&G email account. Note that this file will be the main file to be used in the RTDC upload.

A. Axon RAW data contains following data Need to click to download RAW data.

• Site ID

• Category (Lang)

• Ships in GIV Customers Sales YA

• Ships in GIV Customers Sales

• Ships in Unit Customer Sales YA

• Ships in Unit Customer Sales

2. Yearly Target Values – This is the file where the target values and volumes for the stores are being

populated. It will be extracted manually by OM through Axon application and will be shared to L2 Team via S-Pro SharePoint site for each fiscal year. The OM will upload the file every end of the fiscal year (last

working day of June). This file will only be used ONCE for the whole year. This file contains the following data:

• Value Target

• Volume Target

<u>File Preparation Check's Includes-</u>

For upload in SFDC should have API name in Excel sheet Under Field name on Axon file).

- **AccountNumber__c = Site ID**
- **CategoryName__c = Category(Lang)**
- **RTDCValueYA__c =Ships In GIV Customer Sales YA**

- **RTDCValueTarget__c =Value Target/Ships In GIV Customer Sales IYA (Yearly Upload)**
- **RTDCValue__c = Ships In GIV Customer Sales**
- **RTDCVolumeYA__c = Ships In Unit Customer Sales YA**
- **RTDCVolumeTarget__c =Volume Target/Ships In Unit Customer Sales IYA (Yearly Upload**
- **RTDCVolume__c = Ships In Unit Customer Sale**

Process with the Yearly Target Values (will only be done every 1st week of July)

-<u>Process of Preparing RTDC File for Insert & Upload with provided data.</u>

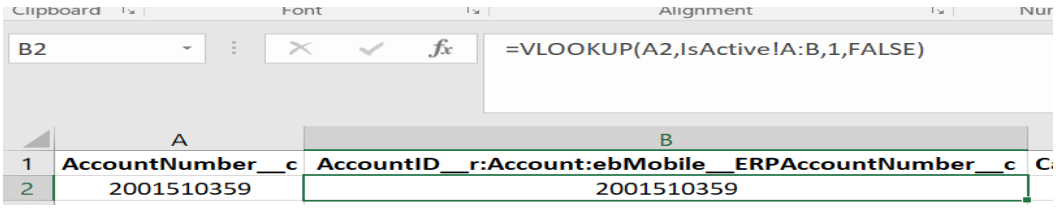
<u>Download the file given by Axon team and extract the zip file.</u>

1.Note: Need to Insert Blank Column between Site Id and Categor- with Column name ERPA

a) Then export (Query- SELECT Id, AccountNumber, ebMobile__IsActive__c FROM Account where ebMobile__IsActive__c = true.(Export)

b) Copy the export excel file in the new sheet file.(AllActive- =Vlookup(A2,AccountNumber false exact match.(=VLOOKUP(A2,AllActive!B:B,1, false)

Example-



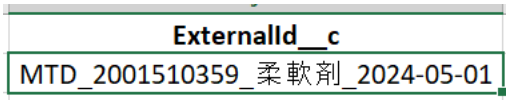
2) Filter out # NA in ERPA Column created and Copy all the data after filter and past in new sheet with API name RTDC template.

3. Filter out Category Name__c with a category value ｷｯﾁﾝｸﾘｰﾆﾝｸﾞ and change to ﾃﾞｨｯｼｭｹｱ. Do the same thing in Yearly Target Values under Category (Lang) field.

4.Under Period Type- MTD and Period _C into YYYY-MM-01T12:00:00:00

5.Add ExternalId__c field. For the value, concatenate the PeriodType__c, AccountNumber__c, CategoryName__c, Period__c (remove the time in the period value) using "_" as the separator.

Example- =CONCAT(H2,"_",A2,"_",C2,"_","2024-03-01")



Upload Points to remember.

Import-

Insert-

Object-CategoryDetailKPI_C

Note: Not all file will be uploaded for failed records they have the records in the backend we just need to Update.

Duplicate Value- They are existing records in SFDC. We just need to Update those ID's in Order to remove the text before ID and Replace All Then Space [] Replace all.

Once done replacing all need to Change the Column error name to ID and delete Column K.L.M.

Email RTDC Upload Report- Need to fill necessary information as provided in email RTDC template and send it to concern team.

Category KPI data- only the RTDC data is displayed on the mobile, values are saved in the category KPI details object.

Store KPI data- RTDC data and call KPI data are saved in storeKPI object.
