Introduction to PO Surveys

PO surveys, also known as Headquarters activities, are an essential aspect of business operations. They are conducted monthly and play a vital role in gathering critical data for business decision-making.

User Roles and Responsibilities

SDO: Creates PO surveys and initiates the workflow.

KAM: Edits and submits surveys, manages user mapping records for stores.

SV: Validates and edits surveys, ensures accuracy before approval.

User Mapping and Connectivity

User Mapping plays a crucial role in PO surveys, establishing connections between KAM and MDS users based on business requirements. Monthly CHQ mapping files are sent for user mapping updates, managed by the L-2 team. Changes in account details reflect after batch job completion. Without user Mapping records KAM, SV, MDS cannot access the details like PO or CHQ ID details. Wherein if user is not able to access PO survey we L-2 team need to cross check the mappings.

CHQ Details consists Information like (**POSM Guideline, Promotion Watchout across Categories, Category and Area Name)**

PO Survey API Name

The API name for PO surveys is AuditTask_c, facilitating data access and management within the survey system.

Approval Flow

- SDO submits to KAM for initial review.

- KAM adds CHQ details, submits to SV for validation.
- SV validates and edits as needed, then approves for

  MDS.

L2 Team Responsibilities

The L2 team maintains PO surveys, ensuring proper user mapping and accessibility. They also monitor survey statuses and resolve visibility issues for end users.

Important Notes

- PO surveys are critical for business operations and decision-making.
- User mapping ensures connectivity between KAM and MDS users.
- CHQ mapping files are updated monthly for user mapping changes.
- Approval flow involves multiple stages for accuracy and validation.
- L2 team oversees PO survey maintenance and resolves visibility issues.

Conclusion

PO surveys are a vital component of business activities, requiring careful coordination between SDOs, KAMs, SVs, MDSs, and the L2 team. Effective user mapping, accurate data validation, and streamlined approval processes ensure the success of PO survey activities in supporting business objectives.

FAQ

1. Is it correct that SV stands for **Supervisor'**?

a) SV stands for '**Supervisor'**. This can also be found in the SDDE file.

2. Regarding PO approval process, do we need MDS to do the final approval for them to see PO in the iPad?

b) The SV does the final approval, once SV approves it, MDS sees the PO beginning on the Effective Start Date.

3. what are the detailed tasks L2 need to do for the PO maintenance?

c) For PO surveys, L2 does not need to do anything, unless business encounters a problem. When there are incidents, L2 needs to check the relevant data if they are correct. The best thing to do here is to keep the CHQ User Mappings maintained correctly every month end during master data upload, because this will determine all the mappings for the PO surveys of the corresponding month.

4. If PO owner changes, sharing list gets cleared, how to solve this issue? L2 needs to add all members to sharing list manually?

f) As advised by L3 team not recommended to change the owner of a PO once it is effective, it is not necessary if the users like SV and MDS are the same. But if it has already been changed for some scenario this cannot be avoided, L2 team can ask L3 team to run the batch job that will automatically add the users back to the sharing the list.

We received a Request, where we were told to change the owner of the PO. After changing the owner, the Sharing list is removed, So Do we need to add it manually or Just wait for batch job run.

INC12673942: Error regarding PO

After analyzing we checked The user "sumida.s@pg.com" did not have Assigned licenses that's why the user was not able to attach files in PO.

INC12514929: IYイトーヨーカドーApril 's PO is not displayed

User was able to view the PO on Apr 4*th* because the user was in the sharing list on that moment. Same day, the PO owner was changed by L2 team, which caused the sharing list is cleared. After that, user doesn't have access to the PO.

After changing the owner of any PO, sharing list gets cleared, after this L2 should process the sharing list again
